CONDENSER, GRAHAM TYPE, GLASS, 400MM, 19/26

NEW

Graham condensers are a simple condenser design used to cool and condense hot vapor as part of a distilling apparatus. These condensers have a coiled inner tube that the condensing vapor passes through, and a large outer jacket that cooling water passes through. Quick fit connectors at the top and bottom.

A 5-IN-1 VALUE!!

SIMPLE MACHINES SET

Students can construct, examine and explain simple machines to develop a deeper understanding of how they make work easier. Contains enough pieces to build a lever, pulley, inclined plane, wheel and axle, and wedge—all at the same time.

Modify machines with 4 included weights (two 5g and two 10 g) and 8 included rubber bands to explore effort, force, load, motion and distance. Labelled pieces assemble easily and separate to store. Set of 63 pieces includes Activity Guide.
