TERM ONE
**SNAPSHOT
SPECIALS**

Welcome to Term 1 and 2026!
Included in this edition is a selection of
our essentials to kickstart the year.

ISSUE 4 - VOLUME 12 - 2026

PLEASE FORWARD TO THE SCIENCE COORDINATOR

DIGITAL METERS

Robust digital DC voltmeter and ammeter ideal for classroom use. Comprising a 3.5 digit LCD digital display mounted on a plastic body, size 90x90x42mm. Comes with an ON/OFF switch and operates on an 9V battery (included). Comes with a replaceable fuse.

ELGACAN STAT DEIONISER, WITH 4 CARTRIDGES

Elgacan Stat deioniser, with 4 cartridges can produce up to 30L/hr of high purity water for a wide range of laboratory applications. The deioniser is a cost-effective stand-alone system that provides low to medium volumes of primary or deionised grade water. Water quality is easy to monitor, with a colour coded resistivity indicator displaying treated water quality.

Supplied with 4 cartridges.

ELECTRIC HEATING MANTLE

Flameless heat, large contact area to glassware, even Heat distribution, rapid heating of contents, for continuous use, powder coated for chemical resistance.

VACUUM PUMP WITH PRESSURE GAUGE

The pump delivers 120mbar Ultimate Vacuum and 18 l/ min flow rate. This pump is ideal for schools with no maintenance and no oil, simply plug and play.

SENIOR TROLLEY

- 1 x Senior Trolley
- 1032 x 508 x 960mm

JUNIOR TROLLEY

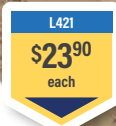

- 1 x Junior Trolley
- 854 x 473 x 960mm

GLASS WASTE BIN WITH LID AND LINER

Disposable. 47 litres. Ideal for school science labs for the safe waste collection of broken glass. This box is printed with broken glass warnings and hazard symbols to help reduce potential workplace injuries from broken glass being put in general waste. Delivered flat, is easily assembled with plastic liner and flip top lid that can be removed when full to seal down box for safe transport to recycling.

77 (H) x 32 (W) x 31 (D)cm

BENCH MATS CEMENT SHEET

- Asbestos-free
- Washable

DIMENSIONS

Small : 300 x 300 x 5mm (W x H x D)

Big : 400 x 400 x 5mm (W x H x D)

SPILL KIT

KIT INCLUDES:

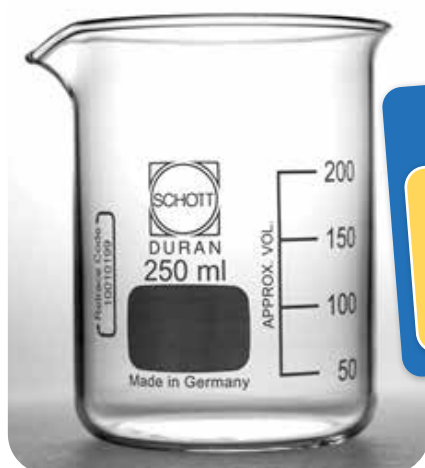

- 1 X 2.5L absorbent powder
- 4 x cleaning clothes
- 4 x pairs nitrile gloves
- 2 x face masks & eye shields
- 2x disposable aprons
- 2 x scoops and scrapers
- 4 x disposable bags
- 1x 10L bucket

Prices do not include GST and are subject to change without notice.

MAXWELL'S WHEEL

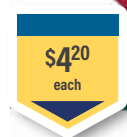

Investigate conservation of mechanical energy and momentum with this intriguing device. The wheel is rolled to the top by means of strings wound on its axle. When released, its potential energy becomes kinetic, allowing it to roll back down. At the bottom, kinetic energy is converted into potential and the wheel rolls upward again. In an ideal world this would continue forever, but friction eventually sets in and the wheel will stop.

BANANA/BANANA LEADS, STACKABLE, 30CM

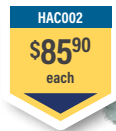

30cm with 4mm end, piggyback banana plug each end

CODE	DESCRIPTION	UNIT	PRICE \$

HEAT ABSORPTION COMPARATOR

A great little device cleverly designed to demonstrate heat absorption and radiation. Use 12 V to activate the globe (supplied) and tabulate and graph the results.

STICK TO SCIENCE CIRCUITS

Easily manipulate circuit diagrams on the board. These 78 magnetic pieces have everything you need to teach common electrical circuit symbols, to sort the components of a circuit and to display series and parallel circuits. Includes a teacher's guide with example activities.

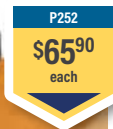

BELL JAR WITH BUZZER, BATTERY OPERATED

When the buzzer is placed beneath the jar and a vacuum seal is created in the chamber, students will observe a total absence of sound. Once air is returned to the chamber, the sound of the buzzer can be heard once more. Activity requires a vacuum pump, not included. Height 14cm, 10 cm Ø

BICYCLE DYNAMO ASSEMBLY

For showing slow AC on an oscilloscope or meter or for demonstrating the use of a dynamo in lighting a lamp. This apparatus has a cycle dynamo mounted on a base. Two 4 mm socket terminals are provided for the dynamo output.

DOPPLER EFFECT APPARATUS

The wavelength of sound is changed by the motion of the source. This apparatus helps students understand with effect easily. Twirl the unit above your head for students to clearly hear the Doppler effect. A great aid for explaining this significant scientific principle.

HAINES

DYNAMIC TRACK, STAND AND RAMP

Complete with height adjustable support and run off ramp to bridge the gap between track and floor when required. Made of robust materials.

Specifications:

Ramp size: 30cm (W) x 120cm (L)

Maximum height: 65cm

PH0355DYTR

\$169⁹⁰
each

Extra large

CHLADNI PLATE WITH VIBRATOR

The first step to visualise acoustics! At special frequencies, standing waves appear on the plate, driving the sand away from the points of large vibration to points of no vibrations.

P937

\$199
each

**NEW
PRODUCT**

DEMOUNTABLE TRANSFORMER SET

Easily conduct activities to illustrate electromagnetism and induction with this set of dissectible coils and cores. Kit consists of a plastic base, a laminated iron core, mounting fixtures and six coils protected in a heat resistant film. Also useful in basic transformer experiments. Coils: 200, 400, 600, 800, 1600, 3200, includes comprehensive instructions and activity guide.

P132

\$395⁹⁰
per set

DYNAMIC CART, METAL

PERFECT FOR INCLINED PLANE & BENCHTOP EXPERIMENTS

**BEST
VALUE**

Modern and compact, designed with robust metal bodies and wheels. Low friction wheel bearings with individual spring suspension. One end of the metal body carries an integral spring plunger/trigger system for explosion experiments, whilst the other end has a clamping screw for attaching ticker tape. Includes velcro pads for non elastic collisions and locating pins to permit secure stacking of trolleys.

Size: 150 x 78 x 50mm, 600g per cart.

PH0351

\$125⁹⁰
pair

STACKABLE

LESLIE'S CUBE TIN

Tin plate box with 130mm sides. The vertical faces of the box are blackened, roughened, varnished and polished respectively. The top opening is fitted with a stopper with a hole for a thermometer (not supplied)

P411

\$46⁹⁰
each

ICE MELTING PLATES

A great demonstration for conductivity and heat transfer. The melting plates display quizzical properties when an ice cube melts on each plate. The aluminium plate that is cold to the touch melts the ice faster than the plastic foam plate, even though both have equivalent temperatures. Includes instruction manual, 1x each aluminium & foam plate (9 x 9 x 1cm)

P149

\$39⁸⁰
per set

MAGNETISING BOX

Recharge your magnet without power. Size of base is 20cm x 13cm. Charger for Bar and Horseshoe magnets

No plugs and no batteries needed.

P4903

\$99⁸⁰
each

FIRE SYRINGE DEMO

Safely demonstrate the principle of the Diesel engine ignition, where heat is produced when a gas is rapidly compressed. When the plunger in the transparent cylinder is rapidly pushed down over a piece of cotton or paper towel, ignition occurs. Size: 22cm tall

P150

\$36⁹⁰
each

INDUCTION COIL, 30MM SPARK

To produce high voltage alternating current or pulses of high voltage current from a low voltage direct current source. Suitable for use with gas-filled discharge tubes, vacuum tubes and for general laboratory work. Requires 6-12V power source.

0090001
\$104⁸⁰
each

SOLENOID

AIR CORED, 660 TURNS

Formed on a strong moulded plastic bobbin, it is used in several experiments or for any time a magnetic field is required of known field strength.

It contains 660 turns of copper wire and can carry about 5 amps maximum current.

P351
\$595
each

CLOUD CHAMBER, COLD PLATE TYPE

This Cloud Chamber requires no dry ice or liquid nitrogen. It uses a specially designed cold plate that is capable of retaining a low temperature for about one hour by freezing the plate in a standard freezer.

Prices do not include GST and are subject to change without n

LENZ LAW APPARATUS

P35
\$43⁹⁰
each

This apparatus allows you to demonstrate electric and magnetic forces. 2 identical-looking plugs are dropped through the copper pipe, but react very differently. As you watch them drop through the viewing window you will see 1 drop quickly and without resistance while the other moves slowly through the tube.

GEIGER COUNTER - DIGITAL

1884001
\$918⁸⁰
each

To detect and count high energy Alpha particles, Beta particles and Gamma rays, to count either continuously or over preset periods of 10sec, 60sec or 100sec. Comes with inbuilt GM tube and LCD display is powered by 3x 'AA' batteries. Socket provided for standard 240/12V.AC. Plug Pak can be used to run the unit.

RADIOACTIVE SOURCES

Half lives displayed on individual disc sources. Isotopes are exempt from individual licensing and require no special handling/ storage or disposal.

PERIODIC TABLE MAGNETIC CARDS

Features the first 20 elements of the Periodic Table to illustrate the core concepts of atomic theory as you sequentially build the table. Cards can be used to illustrate the following major concepts: Families and Periods, Atomic Number and Mass, Isotopes, and Electron Shells and Valency. Size: 10.8 x 14.8cm, includes Elements 1-20 plus Hydride (H-), 14 additional elements (4 H, 3 O, 2 CL, 1F, 2 Na, 2 K), 3Mg Isotopes, and Au & Pb

SOLAR HYDROGEN EDUCATIONAL (FUEL CELL) KIT

Invent your own clean energy applications using fuel cells and the power of the sun. Generate hydrogen in a completely sustainable process by using a solar panel to power water electrolysis. Convert hydrogen into electrical energy with the PEM fuel cell and power your applications. As a starting-off point for would-be inventors, the kit comes with a small electric motor and propeller blade.

FCJ-16
\$220⁹⁰
each

HYDROCAR FUEL CELL KIT

Great entry-level fuel cell car kit. Demonstrates electrolysis of water into oxygen and hydrogen. Includes solar panel to power electrolysis process, experiment guide on CD, as well complete manual. Easy to build and operate, steers independently when meeting obstacles.

KT2526
\$225⁹⁰
each

SPECTRUM DISCHARGE TUBE

To show spectral lines of pure substances. Glass tubes with central capillary portion of about 9-10cm long with electrodes sealed at both ends and connected to lead wires protected by metal caps. Provided with loops welded to caps for electrical connection.

Except for Neon and Helium, these can not be used as lamps. For intermittent use.

- There are 2 ways to run the spectrum tubes:
 - - with a spectrum tube power supply (3785001); or
 - - with a spectrum tube holder (SAB), induction coil (EM013301) and power supply (2633001).

 pkt/10

FOUCAULT'S PENDULUM

Easy to use, compact instrument. Built simple device with an executive wooden stand, conceived as an experiment to demonstrate the rotation of the Earth - while also making intricate patterns in the sand.

Size: 55cm

G985
\$106⁹⁰
 set

DRINKING BIRD

Shows cooling process of evaporation.

HL001601
\$20⁹⁰
 each

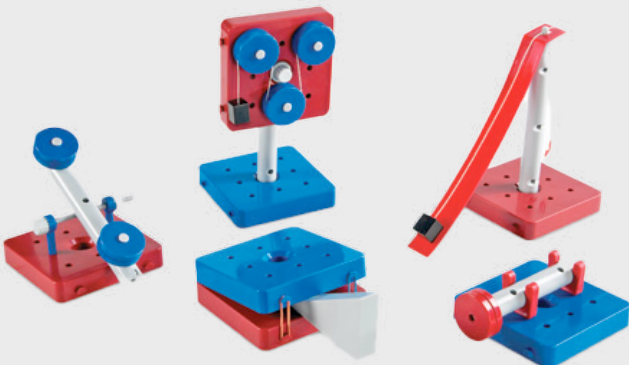

SIMPLE MACHINES SET

63 PIECES, BUILD ALL 5 MACHINES AT THE SAME TIME!

Construct, examine and explain simple machines to develop a deeper understanding of how they make work easier.

Contains enough pieces to build a lever, pulley, inclined plane, wheel and axle, and wedge—all at the same time. Modify machines with 4x weights (2x 5g and 2x 10g) and 8 included rubber bands to explore effort, force, load, motion and distance. Labeled pieces assemble easily and separate to store.

P2442
\$119⁵⁰
 set

Prices do not include GST and are subject to change without notice.

METALS TEST KIT

BEST SELLER

Test for magnetism, heat, conductivity, hardness etc.

- 12 pieces, each stamped for identification

PH0798A
\$19⁵⁰
each

BALL & RING APPARATUS

BEST SELLER

Demonstrate the expansion and contraction of metal.

Brass - Gravesande's

0200001
\$24⁹⁰
each

ELECTROSTATIC STICK

Slide the rubber sleeve along the clear plastic stick and watch the foam balls fly. A vivid demonstration in electrostatics. 30cm long.

ES001
\$32⁸⁰
each

COMPASS, POCKET

Pocket Compass, 45mm dia., a format compass in aluminum case, marked in degrees, with N and S indication. Suitable for use as a plotting compass or for normal application. Colour of string may be different.

MA0140
\$9⁸⁰
each

**NEWTON'S CRADLE,
LARGE**

Demonstrate the conservation of momentum and energy via a series of swinging spheres. Ask students to explain what's going on. Extra large size.

Dimensions 180(l) x 150(w) x 190(h) mm.

YRSC417
\$35⁹⁰
pack

AIR PUCK

Demonstrate Newton's Laws, energy, and momentum with the amazing new Air Puck! It's perfectly balanced and glides on a cushion of air for nearly frictionless motion across any smooth surface. Sturdy bumpers will survive collisions with walls, shoes, or other Air Pucks. Requires 4 - AA batteries, not included. 18cm diameter.

G481
\$19⁸⁰
each

MAGNET VARIETY TEST PACK

13 MAGNETS

A kit of magnets and accessories in a compartmental storage tray. Contents :

- 1x Horseshoe magnet, 6% chrome, 100mm, w/keeper
- 2x Ceramic bar magnets 75mm
- 3x Ceramic ring magnets, 38mm dia., face polarised
- 2x Plotting compasses, 19mm dia.
- 1x Pack Iron Filing.
- 1x square iron
- 1x aluminium
- 1x zinc
- 1x copper metal

PH0800
\$39⁹⁰
pack

PLASMA BALL

- Electrical current flows through negatively ionised gas to create the illusion of lightning
- Black back cover for increased lightning visibility
- Approx 20cm diameter
- Reacts to sound
- Lasts for up to 1000hrs

G221
\$65⁹⁰
each

BINOCULARS

Full size, plastic body.

- Eyepiece with Rubber Cushion
- Sensitive Focus Knob
- 35mm Ø Objective Lens
- Safety Neck Strap

BN-63501
\$25²⁰
each

Prices do not include GST and are subject to change without notice.

HAINES

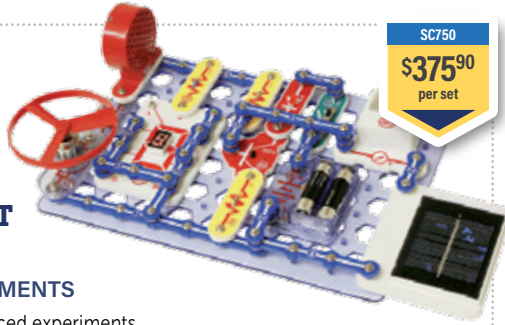

Visit our website www.haines.com.au

Over 80 components

SNAP CIRCUIT - EXTREME

OVER 750 EXPERIMENTS

- 70 computer interfaced experiments
- Study projects in solar power, electro-magnetism & vibration switches
- Uses 4 "AA" batteries
- Includes projects manual

SC750
\$375⁹⁰
per set

BEST SELLER

Over 60 components

SNAP CIRCUIT - SUPER

OVER 300 EXPERIMENTS

The components and connector system are creatively designed to facilitate and optimize learning by engaging students in a meaningful way with exciting projects.

Includes electronic projects book and guide.

SC300
\$175⁹⁰
per set

SNAP CIRCUITS 300 EDUCATIONAL VERSION

300 electronic projects kit. With student and teacher guides, and a storage case.

SC-300R
\$299⁵⁰
per kit

SNAP CIRCUITS 750 EDUCATIONAL VERSION

750 electronic projects kit. With student and teacher guides, and a storage case.

SC-750R
\$495⁹⁰
per kit

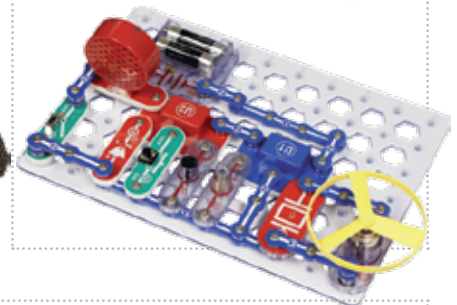

SNAP CIRCUIT - JUNIOR

OVER 100 EXPERIMENTS

- Uses 2 "AA" batteries
- Includes projects manual.
- Ideal for years 6-9

Over 30 components

P190
\$89⁹⁰
per set

SNAP CIRCUITS - GREEN ENERGY

Learn the basics of electronics and modern alternative energy. Explore clean energy concepts, such as electric cars, windmills, and hand-generated power. Includes full-color manual and separate "Think Green" manual that explains environmentally-friendly energy including geothermal, hydrogen fuel cells, wind, solar, tidal, hydro, and others. Perfect for environmentalists and future engineers!

Over 125 experiments & 45 parts

SCI25
\$195⁸⁰
per set

BUZZ WIRE KIT

Learn how to connect an electric circuit. Design different wire shapes with varying levels of difficulty. The aim is to move the metal wand along the wire maze, from one end to the other, without actually touching the wire.

Includes:

- Plastic platform
- Plastic accessories & metal plugs
- Electric buzzer
- Insulated electric wire
- Bendable metal wire
- Instructions
- AA size Battery holder (Batteries not included)

G232
\$29⁵⁰
each

LIQUIFLY WATER ROCKET, DELUXE

NEW IMPROVED DESIGN!

Use air and water to power the bottle rocket more than 100 feet into the atmosphere. Includes fins, two valves, 27cm rocket bottle, hose and pump.

G505
\$44⁵⁰
each

Prices do not include GST and are subject to change without notice.

MINERALS SET, 20 PC

Samples of minerals all clearly labelled. In a neat wooden case (21x13cm). Asbestos free.

S120
\$59⁹⁰
per set

ROCKS SET, 49 PIECE

Samples of igneous, metamorphic and sedimentary rocks. All clearly labelled. Rocks are stored in a neat wooden case (29x21cm). Asbestos free.

S110
\$119⁹⁰
per set

SEISMOGRAPH MODEL

Teach the measurement of natural phenomenon. Seismograph recorder with attached support and suspended weight registers visual shock waves from simulated earthquakes.

Size: 30 x 15 x 12.5cm

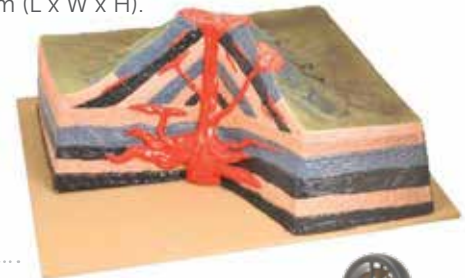

540
\$89⁹⁰
each

VOLCANO MODEL

Section showing flow of magma. Made of unbreakable material, coloured. Showing vertical section for students to view the path that magma takes on its upward course. Mounted on base and numbered with English Key Card.

Size: 420 x 406 x 203mm (L x W x H).

B588
\$189⁹⁰
each

FRACTURES, FAULTS & DISLOCATIONS MODEL

Excellent way to illustrate various structures related to fault planes and fractures. Shows cross section of five different structural features. The features are labelled and a numbered key is printed on the base.

Size: 47.5(L) x 30(D) x 22.5cm(H)

B582
\$199⁹⁰
each

HAND-HELD ANEMOMETER

Provides wind speed and temperature information for any outdoor activity. The main display shows wind speed, with the sub-display showing temperature. The feature-packed device is small enough to fit in your pocket.

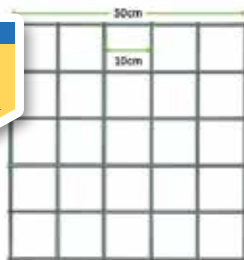

W337
\$89⁹⁰
each

QUADRAT GRID 50 X 50CM, 10CM GRID

Quadrat Grid-50x50 with 10cm squares. For taking population survey on flat terrain. Size. 50 x 50cm with 10cm grid size. Stainless steel PVC Coating.

B118
\$39⁹⁰
each

SIEVE, SET/3

Soil is made up of a range of particles from fine clay/silt to coarse sand and gravel. These particles can be separated and identified with the aid of mesh screens. Sorting sieves, mesh size: 5 (4mm), 10 (2mm) and 60 (0.25mm).

HM-6
\$89⁸⁰
set/3

ORBITOR MODEL, WITH LIGHT

Model demonstrates daylight, night, seasons and phases of moon. Sun, earth and moon revolve around one another on this gear driven model. Sun is 15cm in diameter. An illustrated guide is included.

B750
\$179⁵⁰
each

SOLAR SYSTEM MODEL, WITH LIGHT

This 3D model allows students to study our solar system. Planets can be set by month to show their relative positions.

The 15cm sun is supported on a sturdy base with the outer most (dwarf) planet being 45cm from the sun. An illustrated guide is included with planet position tables.

B740
\$189⁹⁰
each

Prices do not include GST and are subject to change without notice.

AUSTRALIA ROCK KIT AND PLATE TECTONICS POSTER

A safe, large 29pc rock set especially designed for Australian schools as part of the Teacher Earth Science Education Programme (TESEP). Includes one free registration to a TESEP professional development workshop.

Purchase this set of 10 igneous, 9 metamorphic and 10 sedimentary rocks that are all:

Large palm sized samples so key features can be studied

Completely safe, free from asbestos, asbestos-like minerals and other toxic materials. Each rock sample has been inspected by TESEP geoscientists.

Plate Tectonics: The reason for the Challenging Earth

GENERAL FOSSIL COLLECTION

The General Fossil Collection is perfect for illustrating the major life forms present throughout geologic history. These 15 fossils are a great way to visually introduce students to life forms from the prehistoric era, along with a geologic timeline included with the collection to match the fossil with the era.

METER, WATERPROOF, WITH PH/ CONDUCTIVITY/TDS/ SALINITY/TEMP

These Thermo Scientific Eutech waterproof meters are ideal for all your environmental study work. Cost effective, accurate and easy to use. Simultaneous temperature display, auto off with battery included.

CLOUD BOTTLE

Amaze students with this easy to perform cloud demonstration. Add a few drops of water inside the bottle, add pressure. When you lift the lid a cloud will form inside the bottle. A thermometer strip records the temperature changes during the demonstration. 26cm tall.

UV LIGHT DETECTING BEADS, PKT/250

Expose the beads to UV light and watch them change colour. Great for use in UV experiments. Pk/250.

UV TORCH, 21 LED, 395NM BLACK LIGHT

Ultra-bright and efficient 21-LED torch. You can brighten-up UV colour change beads, fluoresce glow-in-the-dark objects (even during the day), search for security markings, check out fluorescent minerals in rocks and much more.

SECCHI DISC

200mm disc in four quadrants. Weighted and includes 20m of line. Determine water clarity.

MOHS SCALE OF HARNESS - MINERAL COLLECTION

This collection is the traditional Mohs Scale which assigned a "hardness" to ten key minerals with talc #1 (the softest) and diamond #10 (the hardest). The first 9 minerals are included in this set. Nine specimens approximately 2.5cm x 4cm, number-coded.

TURBIDITY TUBE

Measure water transparency (turbidity) where a Secchi disk cannot be used. Turbidity in NTU is a useful operational test of water clarity and can be used as an early warning test for contamination. Size: 605mm length, 25mm diameter.

Measure marking range: 10-400 NTUs

Clear polycarbonate tube

Prices do not include GST and are subject to change without notice.
