

Air and Water SB

Trapping Air

Squeeze the opening of the bag.

Fold the opening over and close the clip!

Trap air in the plastic bag and see how it feels!

Push!

WARNING

- Do not place the plastic bag over your head or face.
- Do not place parts in mouth to prevent accidental swallowing.
- Never point or shoot your air or water gun at people, glass, or other objects.
- Read instructions carefully before use. Use only as directed by a parent, guardian, or instructor.

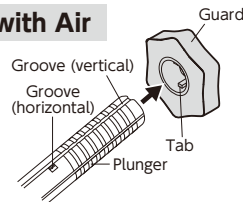

Name _____

Launching with Air

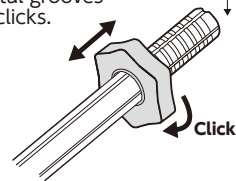

The Guard

- With the tab aligned with the vertical groove, push the guard onto the plunger.

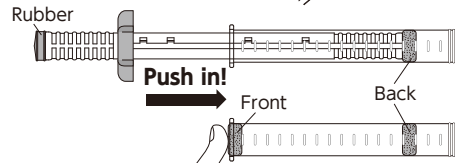

- Twist it onto the horizontal grooves until it clicks.

★ This side has no rubber!

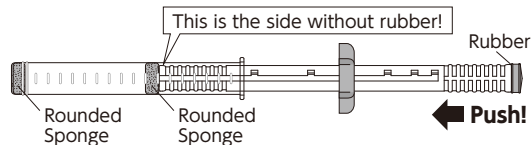

The Cap

- 1 Add the back sponge to the tube and push the plunger into launch it.
- 2 You can also trap air in the tube and add the front sponge before you launch it!

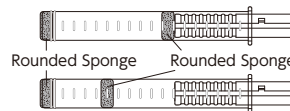

- Trap air in your tube as shown below and see how the sponge flies!

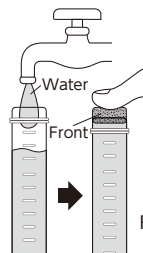

Try it Out!

Try moving the sponge to see what happens!

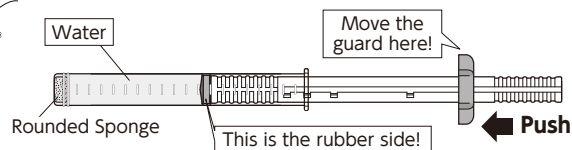

Launching with Water

- 1 Add a sponge, then insert the rubber end of the stopper into your tube, then fill the tube with water and add the front sponge.
- 2 Pick a target, then push in the plunger to launch the sponge!

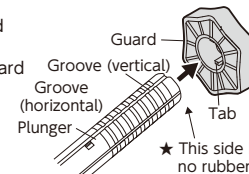

- Make a water launcher and see how it works compared to your air launcher!

Where's the Air?

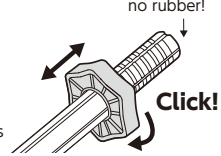

The Guard

- With the tab aligned with the vertical groove, push the guard onto the plunger.

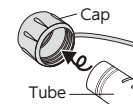

- Twist it onto the horizontal grooves until it clicks.

★ This side has no rubber!

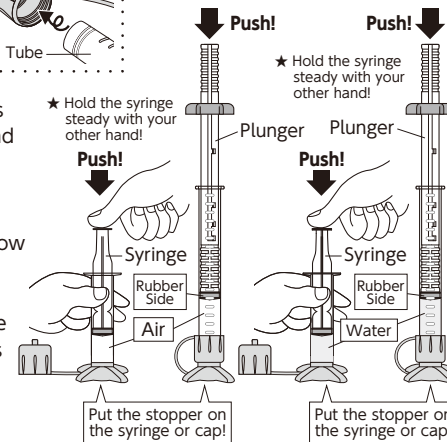

The Cap

- Twist the cap onto the tube!

- 1 See what happens when you push and let go!
- 2 How does it feel?
- 3 Add your star sponge and see how it changes shape!
- 4 Trap water in the tube or the syringe to see how it feels compared to air!

Try it Out!

Making a Water Gun

Remove the stopper from the cap to make a water gun!
