

# Covid-19 Rapid Antigen Test

The ARISTA™ COVID-19 Rapid Antigen Test intended as an aid for the detection of staff and students with Covid-19.

Fast & early detection enables initial isolation measures to reduce further spread of the virus. Create greater safety in workplace, social gathering, school and travel settings.

#### Features:

- TGA approved for Australia (ARTG 370592)
- For use in Point-of-Care settings under the direction of healthcare practitioners
- Utilises minimally invasive nasal swab, or Nasopharyngeal sample collection methods
- Rapid results in 15 minutes
- All-in-one package
- Allows for flexible, cost-effective repeat testing
- Viva Life app and organisation platform available for test data management

Results from comprehensive laboratory studies conducted on 31 mutated strains of the SARS-CoV-2 virus confirm that the ARISTA™ COVID-19 Antigen Rapid Test is able to detect all major variants of the SARS-CoV-2 virus.

The **ARISTA™ COVID-19 Antigen Rapid Test** is a lateral flow immunoassay intended for the qualitative in vitro detection of SARS-CoV-2 virus nucleocapsid (N)-protein antigen in humans. The test is intended as an aid in identifying COVID-19 infection and is available for professional use at point-of-care by healthcare providers or personnel trained in any laboratory and non-laboratory environment that meets the requirements, and for self-test use in accordance with local regulations.

Please note: COVID-19 rapid antigen tests must only be used by relevant healthcare practitioners, or persons under their supervision. It is prohibited to supply COVID-19 rapid antigen tests for the purpose of self-testing (home use). Negative test results do not exclude infection with COVID-19 (so face masks, social distancing and good hygiene practice must be maintained). Positive test results or symptomatic persons require immediate confirmatory testing with a polymerase chain reaction (PCR) test.

Run your safety program with ease and oversee the test status of your staff and students

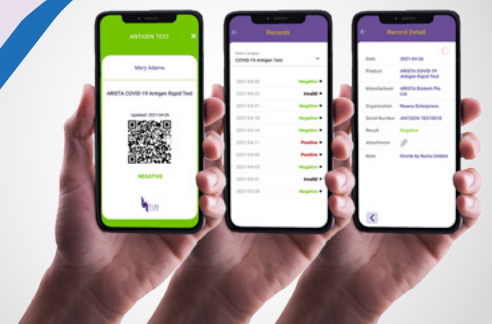

Use the online account to easily manage your testing program and facilitate a safer environment for all.

## Viva Life App and Viva Life Enterprise Account

Use the Viva Life App and/or Viva Life Enterprise Account together with the **ARISTA COVID-19 Rapid Antigen Test** for an integrated end-to-end testing and data collection package when screening for COVID at the point of care. The software manages the whole testing process and ensures compliance by providing an electronic proof of test.

**For individuals:** **Viva Life App** creates verifiable digital health certificates and securely stores your test records – simplifying your life by enabling easy access to this information when you need it.

**For organisations:** **Viva Life Enterprise Account** is compatible with Viva Life App, enabling your people to automatically sync their test records to your organization dashboard – allowing you to easily manage your testing program and facilitate a safer environment for all.
